

Punit Sehrawat

Gameplay Programmer / Unity Developer

punitseh123@gmail.com — +91 9350094973 — Portfolio — Itch.io — GitHub — LinkedIn

Education

Chandigarh University, Punjab

B.E. Computer Science Engineering (Graphics & Gaming)

Jul 2022 – Jun 2026

Rishikul Vidyapeeth, Sonipat

Class XII (CBSE)

2022

Class X (CBSE)

2020

Achievements

- **Best Gameplay Factor Award** — Global Game Jam Site, Chandigarh University (Feb 2026)
- 3rd Position — Genesis-X Gamathon, AI Fest Chandigarh University
- 3rd Position — Game Jam (April 2025)
- 2nd Position — Tech Era 2.0 Project Exhibition, Chandigarh University
- 1st Position — Institute Project Expo 2025; 3rd at Cluster Level

Experience

Yellow Cap Games (Remote)

Jan 2026– Feb 2026

Gameplay Programmer Intern

Worked on **Auto Rush**, a 3D mobile arcade game developed in Unity using C#. Developed infinite procedural generation systems using modular prefab segments, gameplay UI, progression systems, obstacle collision handling, and interface-based power-up systems while optimizing gameplay flow and difficulty scaling for mobile devices.

Blood Nexus Studio (Remote)

May 2025 – Aug 2025

Unity Game Developer Intern

Worked on Sheriff Showdown, a 2D mobile shooter where I developed in-game shop systems, checkpoint-based respawn systems, trajectory prediction mechanics, bullet reflection systems, and gameplay feedback systems using Unity and C#.

Technical Skills

Game Engine: Unity (2D / 3D)

Programming: C#, Object-Oriented Programming

Gameplay Systems: Enemy AI, Procedural Generation, Shops, Save Systems, Combat Systems

Optimization: Object Pooling, Mobile Optimization

Tools: Git, GitHub Desktop, Mobile Deployment

Game Development: UI Systems, Physics, Animation Integration, State Machines

Projects

Tank Game (Unity 2D)

Solo Project

- Designed gameplay architecture including Menu, Playing, Pause, and Game Over systems.
- Implemented player movement, shooting systems, enemy AI, combat systems, and progression mechanics.
- Optimized gameplay using object pooling systems for enemies and bullets.

Push The Box (Unity 2D)

Solo Project

- Developed Sokoban-inspired puzzle mechanics using grid-based movement systems.
- Built teleport systems, progression logic, level completion handling, and environmental interactions.

Save The Kid (Unity 2D)

Solo Project

- Developed wave-based survival gameplay with NPC protection and melee combat systems.
- Implemented enemy targeting systems, rewards, shields, and health mechanics.

Blastinator (Unity 2D)

Game Jam Project

- Implemented enemy AI state behaviours including pursue, strafe, and retreat systems.
- Built weapon switching systems and delivered a complete gameplay loop during the game jam.
