Professional Summary

Unity Gameplay Programmer with hands-on experience building and publishing 2D/3D mobile games in C#. Experienced in gameplay architecture, enemy AI, procedural generation, combat, progression, UI, physics, state machines, event-driven systems, object pooling, and mobile optimization. Unity internship experience across production gameplay features, with independent experience shipping a Unity game on Google Play and integrating Unity Gaming Services for leaderboards and ads.

Experience

Yellow Cap Games

Jan 2026 – Feb 2026

Gameplay Programmer Intern / Remote

- Developed gameplay features for **Auto Rush**, a 3D mobile arcade game using Unity and C#.
- Implemented infinite procedural generation using modular prefab segments for continuous gameplay.
- Built gameplay UI, progression, obstacle collision, and interface-driven power-up systems.
- Optimized gameplay flow and difficulty scaling for mobile.

Blood Nexus Studio

May 2025 – Aug 2025

Unity Game Developer Intern / Remote

- Developed gameplay systems for **Sheriff Showdown**, a 2D mobile shooter using Unity and C#.
- Implemented shop systems, checkpoint respawn, trajectory prediction, bullet reflection, and combat feedback.
- Integrated gameplay mechanics into the core combat loop.

Technical Skills

Game Engine: Unity 2D/3D **Language:** C# **Version Control:** Git, GitHub

Programming: OOP, Interfaces, C#Events, Observer Pattern, State Machines, Modular Architecture

Gameplay Systems: Combat, Enemy AI, Procedural Generation, Progression, Save Systems, Shops, Power-Ups

Unity Development: Prefabs, TextMesh Pro, Physics, UI Systems, Animation Integration, URP, Unity Gaming Services

Optimization: Object Pooling, Mobile Optimization **Deployment:** Android / Google Play

Projects

Tanks Battle (Tank Game)

Unity 2D | C# | Solo | Published

- Independently developed and published **Tanks Battle** on Google Play, taking the project from gameplay development through Android deployment.
- Architected an **event-driven game-state system** covering Menu, Playing, Pause, and Game Over states; implemented movement, aiming, shooting, health, enemy spawning, pursuit, attack, and death behaviours.
- Built persistent progression with score, currency, rewards, tank shop, unlock/equip mechanics, and stat-based balancing.
- Integrated **Unity Gaming Services (UGS)** for leaderboard functionality and **Unity Ads** for in-game monetization.
- Used **object pooling** for bullets and enemies to reduce repeated runtime instantiation during combat.

Save The Kid

Unity 2D | C# | Solo

- Developed 2D survival gameplay with melee combat, endless enemy spawning, NPC protection, health, shields, and rewards.
- Implemented enemy targeting logic allowing AI to select between the player and protected NPC as combat targets.

Card Kingdom Solitaire

Unity 2D | C# | Assignment

- Built modular gameplay, deck, scoring, data, and UI systems with clear separation of responsibilities.
- Implemented a 52-card deck with card data, suit/rank validation, shuffling, drawing, hand management, and game-state control.
- Used C#Events and the Observer Pattern for event-driven communication and PlayerPrefs for persistent scores.

Push The Box

Unity 2D | C# | Solo

- Implemented grid-based movement and Sokoban mechanics across **6 handcrafted puzzle levels**.
- Developed teleport portals, cooldown logic, level progression, win-condition validation, and environmental interactions.

Achievements

Best Gameplay Factor Award – Global Game Jam Site, Chandigarh University (2026) | **3rd Place** – Genesis-X Gamathon

3rd Place – Game Jam (2025) | **2nd Place** – Tech Era 2.0 Project Exhibition

1st Place – Institute Project Expo 2025 (3rd Place at Cluster Level)

Education

Chandigarh University, Punjab

Jul 2022 – Jun 2026

B.E. Computer Science Engineering (Graphics & Gaming)
